Hey Eric,

Can you add me to the OSC.NET site (I am assuming that we have one)

As for what is going on – I think we are expecting some back and forth with Marty to get things right. In this case it was an easy fix, but we will try and do a better job of reviewing things before we send to Marty but that can take time. Earlier yesterday he said to just feed him things as we get them done and to not have it go through review by Kristie and the CHP Prior to sending him the stuff. The assumption was we would do some back and forth. I think he is so used to us being perfect that he is not used to having to do a little bit of direction.

I think getting him plugged in with Alex and the CHP this morning is going to help immensely and having Eric Bay on site to help do things for him will also help. Melissa and I will also help as much as possible remotely and will be there for him.

I am writing the START DMP as we speak, I will require some input from Ebay and company when he gets on site to finalize field processes (I don't want to dictate to them how to do things). I am also trying to get the photos, mapping and sample tracking set up today but probably tomorrow is more realistic with Ebay's travel schedule.

Also if you need me anywhere REOC > Field etc. please let me know and I will go wherever is necessary to help you out.

So this ERD diagram is not even close to the Data Element Dictionary (DED) that I provided. There is no locations table and there is an events and site table that were not in my DED. I care not what things look like in Scribe, I would like something that matches the DED I provided.

I am starting to create a new one now, I you can do it faster please let me know...

This has been a wierd response, we are not on the same page. I know I am tired... Please let me know if I am not being clear...

Subject: Las Canchas Fires ER Data Element Dictionary - MARTY Draft

Hey all:

Sorry, I ripped and tore and crumbled a new data dictionary. This will be our starting point for the draft inter-agency Data Management Plan that I need to pull together tonight. The additional components that I would still need to pull together are:

- 1) An ERD diagram
- 2) Data entry templates

This draft DMP will go out for comment at a 7:45am meeting and we hope to finalize by noon tomorrow.
